

INTRODUCING SuperCurve

Specifically designed to enhance performance on heavily trafficked and stressed roads – in particular at roundabouts and junctions. A high performance 10mm polymer modified asphalt surface course with clause 942 accreditation.

WHY SUPERCURVE?

IMPROVED DURABILITY

Add durability to high-stress areas with the high performance 10mm polymer modified asphalt surface course.

SAVES MONEY

Use as an alternative to a HRA and Chip, saving on the cost of a chipping gang.

CRACK AND SKID RESISTANT

Experience good low temperature cracking resistance and excellent skid resistance.

LONG WARRANTY

Get a five year warranty – now approved to SHW Clause 942.

REDUCED DEFORMATION

Use a material with properties that provide good resistance to deformation – even at high temperatures.

ECO FRIENDLY

Create sustainable projects – all mixes can be supplied as SuperLow warm mix asphalt.

Can be sold with or without 942 approval.
